Superior Raw Material | Advance Manufacturing Process | System Driven | High Ethics

Nanak Electric Stores was founded in 1960 and what a journey it has been for the past 60 years and we are here now. We have been in the industry for such a long time that we thought it was the most appropriate time for us to enter into a more direct relation with our valued customers. This led to the inception of **Excel Control Systems**. With our continuing efforts to provide our customers with excellent quality in terms of products and services we have diversified into Original Equipment Manufacturing Industry.

Excel - a leading manufacturer in the field of Storage & Electrical Solutions

- Linear work flow across the process.
- Manufacturer backed by state of art multiple CNC Shearing, Bending & LASER Machines.
- State of Art machines - Hydraulic Power Presses , Welding, Grinding.
- In house conveyORIZED 9 Tank Pre-Treatment & powder coating plant.
- In house Testing machines for raw material and powder coating.
- Process adherent to systems like ISO & 5S for workplace efficiency.
- Certified superior raw material.
- In house Teams - Design, Estimation, Complete Production, Quality Control, Inventory, Dispatch, installation & service executed by professional and experienced team.

We once again look forward to hear from you regarding your current and future requirements.

HEAVY DUTY STORAGE

sectional panels of either MS or SS can be used - wooden or plastic pallets can also be used for shelving - available in paint , powder, GP and hot dip finish

Maximum vertical utilization of space • Safety • Durability • Convenience • Accessibility • Space Saving

One big benefit of pallet racking is that it is a great space saver. The way the racks are constructed allows businesses to make up of the vertical space instead of valuable floor space. Any opportunity to save space and still accomplish your goals is always welcomed. The way that a pallet racking system is set up makes it possible for forklifts to reach up into the air and bring down pallets whenever they need one. The stacking ability of the racks is what saves space and will save money.
